ERRATA.

In lines 1 and 2 of the abstract of CARMICHAEL and BELL'S paper on a new phenanthridinium compound (1553) in this *Bulletin*, 1945, v. 42, 260, the group " 9–phenyl " was inadvertently omitted from the formula which should read 2: 7–diamino–9–phenyl–10–methylphenanthridinium bromide.

In the title of the paper by EAGLE abstracted in this *Bulletin*, 1945, v. 42, 354, the Greek letter *gamma* was misprinted as V ; the name of the drug should read γ-(p-Arsenosophenyl)-Butyric Acid.

In the abstract of Dr. A. F. FOWLER'S paper in this *Bulletin*, 1945, v. 42, 541, the sentence " Trypanosomes were present in the cerebrospinal fluid in 33 of the 42 patients " should read, as explained by the author in his paper " Positive C.S.F. means that there was either direct or indirect evidence of central nervous system involvement. Thus thirty-three cases, i.e., 78 per cent. showed involvement of the central nervous system ". The abstracter regrets to have overlooked this explanation of the + sign in the table.
